Summary

Java Fullstack Developer with 4+ years of experience building secure, enterprise-scale applications using Java 8, Spring Boot, Microservices, REST APIs, Hibernate/JPA, Oracle Database, SQL, and React. Experienced in designing scalable backend systems, optimizing REST APIs, resolving production issues across distributed systems, and delivering secure transaction processing supporting millions of transactions.

Education

KJ Somaiya College Of Engineering — Mumbai, India
Bachelor of Technology in Electronics and Telecommunication — *Aug. 2019 – Jun 2022*

Agnel Polytechnic — Navi Mumbai, India
Diploma in Industrial Electronics — *Jun. 2016 – Jun 2019*

Experience

Senior Java Fullstack Developer — Sep 2026 – Present
TransUnion CIBIL (via MITS Global Consulting Pvt. Ltd.) — *Mumbai, India*

- Developing enterprise applications using Java, Spring Boot and React.

Staff Consultant (Java Backend Developer) — Sep 2024 – Sep 2026
Oracle Financial Software Services Ltd — *Mumbai, India*

- Designed and developed backend systems for HDFC Netbanking, handling 150K+ daily transactions.
- Designed, developed, and optimized 10+ REST APIs using Java and Spring Boot for onboarding and transaction processing, supporting 10K+ users per month.
- Led integration of fraud detection systems (BioCatch, PRM), preventing 2M+ fraudulent attempts annually.
- Resolved a critical fraud attack involving repeated bot requests by implementing rate limiting and request validation, significantly improving system security.
- Troubleshot production issues across distributed systems and mentored junior developers through code reviews and Agile deployments.

Associate Consultant — Jun. 2022 – Aug. 2024
Oracle Financial Software Services Ltd — *Mumbai, India*

- Optimized UI/backend flows for EPI transactions, bug-bounty ISG issues and implementing textual changes that supported 50K+ monthly HDFC users without downtime.
- Optimized application performance and resolved 10+ production incidents, improving application stability and reducing recurring issues; used SonarQube for static code analysis and OWASP-aligned security scanning.
- Implemented RBI-mandated compliance change.

Projects

Alpha E-Commerce Platform | *Spring Boot, REST APIs, Microservices, PostgreSQL, JPA, React, AWS S3*

- Developed production-ready e-commerce site with React frontend and Spring Boot/JWT backend, handling concurrent users via PostgreSQL + JPA; integrated Razorpay for secure payments and S3 for media storage.
- Implemented cart/order management with real-time inventory sync, reducing checkout abandonment through optimized state management. GitHub

NewsMonkey | *React, Bootstrap, REST API integration*

- Built a responsive news reader consuming a third-party News API with category-based discovery and infinite scroll. GitHub

Technical Skills

Languages: Java 8, SQL
Frameworks: Spring Boot, Spring Security, Spring Cloud, Hibernate, JPA, Microservices
API/Misc: REST APIs, JWT/OAuth2, RabbitMQ, Kafka, JUnit, Kibana, Grafana, ChatGPT/Codex (agentic), SonarQube, OWASP
Frontend: React, JavaScript, HTML5, CSS3, Bootstrap
Databases: Oracle, PostgreSQL, MySQL
DevOps: Docker, Kubernetes (Basics), GitHub Actions (CI/CD), Maven, Oracle Weblogic, IBM Websphere
Certifications: Oracle Certified Professional – Java SE 8
